

# MEDICINE MANAGEMENT

Annual medicine management updates for RNs were delivered virtually using ECHO methodology. A programme consisting of four sessions was developed:

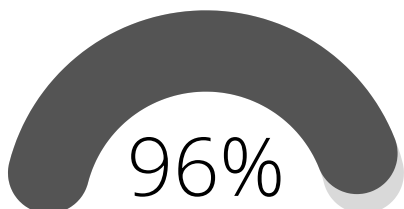

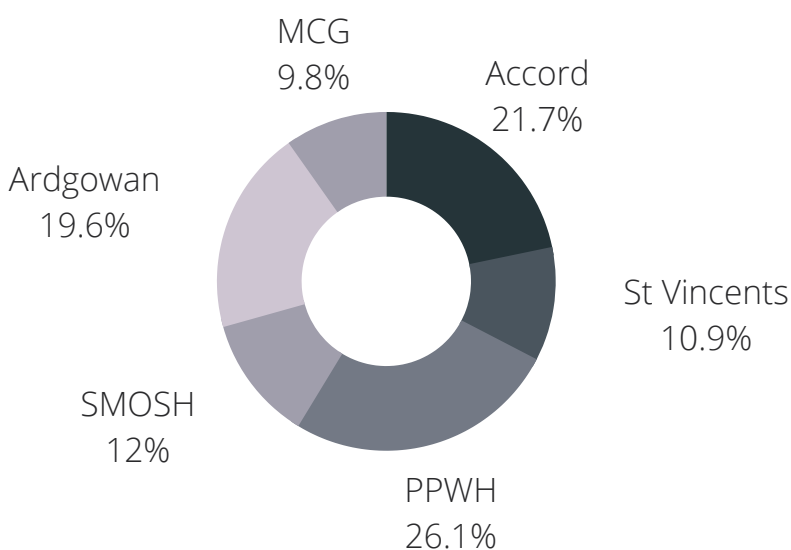

- Effective medicine management including incidents
- Opioid toxicity and dose conversions
- Assessment and management of nausea and vomiting
- Pharmacy update

Programme was delivered 5 times over a period of 10 months in collaboration with PPWH.

122  
participants

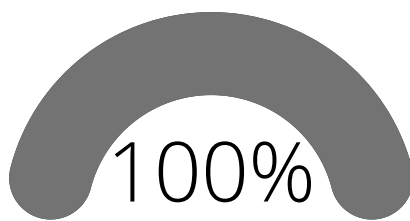

## 6 GGC Hospices

96% of participants stated the content of the programme was extremely] or very useful and relevant to their practice.

100% of participants would recommend the virtual programme to colleagues

## Participant Comments

"The programme was relevant & content excellent, presenters too. Facilitators and admin team very friendly and welcoming."

"Was apprehensive using technology as not the most technical person, however, having participated in the programme now not as worried. Also feel this could be the way forward for future training and education."

"Found it very insightful, being interactive made it less dry although slightly challenging at times."

"Thoroughly enjoyed meeting everyone and it was great to share ideas, thoughts and feelings. A good support all round while learning. Many thanks for all the effort that has gone into making this"

"Enjoyable session and thanks to all involved. Good engaging in rooms with colleagues from other hospices and I think worked better than sitting in a class."
